SCHMITZMIX CONCRETE PROJECT GALLERIES

Colored Concrete Sidewalk and Path

Concrete for sidewalks and paths is standard fare for most South-eastern Wisconsin homeowners. But standard fare doesn't mean concrete sidewalks and paths have no role to play in landscape design.

This integral colored concrete sidewalk beautifully handles the change in elevation from the family room to the path, while blending almost naturally with the home's brick veneer and planting areas.

The gentle curves and irregularly-sized sections of sidewalk and path easily accommodate foot traffic, without calling undue attention to the pavement. Consider using integrally-colored ready-mixed concrete to create a natural look for the pavements at your home.
