SCHMITZMIX CONCRETE PROJECT GALLERIES

Colored-Stamped Concrete Driveway

Beautiful and functional, this colored-stamped concrete driveway echoes the look of a hand-laid slate pavement, at a fraction of the cost and without the construction waste and lengthy installation period inherent in the use of natural pavement materials.

This concrete driveway will handle traffic loads better, provide superior durability, and require significantly less maintenance than a real slate drive. But like real slate, the colored-stamped concrete creates an elegant contrast between the drive, the natural stone and bark mulch in the planting area, and the home's cedar shake shingles and brick veneer.
